Backend Developer | Cloud & DevOps Enthusiast

Backend Software Engineer experienced in developing REST APIs and backend services through Node.js, TypeScript, Express.js, and MongoDB. Working currently with BizArt – Creator Platform with features such as messaging, portfolio, and marketplace functionality. Interested in backend design, cloud computing, DevOps and distributed systems.

Technical Skills

Programming Languages: TypeScript, JavaScript, SQL, Bash

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, MongoDB Atlas, PostgreSQL, Redis

Cloud: AWS (EC2, S3, CloudFront, IAM)

DevOps & Infrastructure: Docker, Terraform, GitHub Actions, Jenkins, Linux

Monitoring & Observability: Prometheus, Grafana

API & Security: OpenAPI (Swagger), JWT, OAuth 2.0, Rate Limiting

Development Tools: Git, GitHub, VS Code

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design

Professional Experience

Associate Software Engineer

Bizpel Connecting Dots Pvt. Ltd.

June 2026 – Present

- Building scalable backend services for BizArt – a creators platform that helps with portfolio creation, posting of content, creation of reels, communication, exhibits, and marketplaces functionalities.
- Building RESTful APIs using Node.js, TypeScript, Express.js, and MongoDB.
- Built an authentication and authorization mechanism using JWT tokens.
- Built media uploading APIs, notification APIs, and user profile management features
- Integration of backend services with a mobile application built in React Native (Expo).
- Assisted with backend design discussions and cloud deployment activities.

Full stack developer intern

Bizpel Connecting Dots Pvt. Ltd.

February 2026 – May 2026

- Acquired skills in backend development through contributing to the BizArt project utilizing Node.js, Express.js, and MongoDB.
- Helped senior software engineers develop and test RESTful APIs.
- Created simple backend functionalities and bug fixes.
- Gained hands-on experience with JWT authentication, MongoDB, and Git.
- Contributed to API integration, testing, and code review.
- Worked in an Agile environment along with other frontend developers.
- Participated in daily stand-ups and sprint planning

Front-End Developer Intern
Scotinent Technologies Pvt. Ltd.

February 2024 – May 2024

- Developed responsive React.js interfaces.
- Integrated REST APIs.
- Built reusable UI components.
- Collaborated using Git workflows.

Projects

HiveFund - AI Powered Crowdfunding Platform

Technologies: React.js, Node.js, Express.js, MongoDB, TypeScript, JWT, Razorpay, Machine Learning, Blockchain (Ethereum), Docker

- Created a full stack crowdfunding site that allows you to create a campaign securely and donate.
- Developed REST APIs to perform authentication, campaign operations, and payments.
- Used token-based authentication and role-based access control.
- Created AI / ML based system to help find suspicious campaigns.
- Made use of blockchain principles in order to enhance the transparency of crowdfunding operations.
- Designed MongoDB schemas and deployed the application.

CloudCart - Cloud Native E-Commerce Backend

Tech Stack: NestJS, PostgreSQL, Redis, Docker, AWS (EC2, S3, CloudFront, IAM), GitHub Actions, Terraform

- Developed a cloud-native e-commerce backend that supports authentication, products, orders, inventory, and payments.
- Created RESTful APIs with secure JWT authentication and role-based authorization.
- Cached API responses using Redis to increase response speed and optimize application performance.
- Moved media files into AWS S3 buckets and used CloudFront for content delivery.
- Created Docker images and automated the deployment process using GitHub Actions.
- Used OpenAPI (Swagger) for documenting the APIs and PostgreSQL for query optimization.

RealtimeHub - Distributed Messaging Platform

Tech Stack: Node.js, TypeScript, Socket.IO, Redis, Docker, AWS EC2, Prometheus, Grafana

- Designed a live chat service with options for one-on-one and group messaging.
- Integrated Socket.IO technology for communicating with users that have their online status, typing indication, and confirmation for message delivery.
- Redis was employed for session handling and caching of information for performance optimization purposes.
- Created REST APIs for authentication, management of chats and messages.
- Docker containerized the app and launched on AWS EC2.
- Monitored application using Prometheus and Grafana.
- Configured GitHub Actions to automate application build and deployment workflows.
- Followed Git-based development practices with modular code organization for easier maintenance and future enhancements.

Education

PES University, Bengaluru

Master of Computer Applications | 2024 – 2026

- Focused on advanced software engineering, scalable backend systems, cloud computing, and modern application development.
- Relevant Coursework: Advanced Data Structures & Algorithms, Cloud Computing, Distributed Systems, Database Management Systems, Computer Networks, Software Engineering.

SBRR Mahajana First Grade College, Mysuru

Bachelor of Computer Application | 2021-2024

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, SQL

Certification

- Web Development Fundamentals issued by IBM skillsBuild
